

Rabbit Holes

When I say **my thoughts are birds** I mean

Upto one billion birds die from window strikes in the US each year

And my skull is glass

When I say **my bones feel heavy today**

I mean; The Apollo 11 only had 20 seconds worth of fuel left when it landed

And gravity is the fuel to my exhaustion

When I say **I'm an invasive species**

I mean; Termites eat through wood twice as fast while listening to rock music

And I have colonised most of the world in spite

When I say **I feel like Truman Burbank**

I mean; Froot loops are all the same flavour

And the Universe is a pathological liar

When I say **I feel invincible today**

I mean; Human life expectancy has increased more in the past 50 years than in the 200,000 before

And I'm really made of plastic not glass

When I say **I hope death is nothing like being underwater**

I mean; If you die in Amsterdam with no next of kin, a poet will write you a poem and recite it at your funeral

And there's comfort at the bottom of a swimming pool

When I say **my words are like Lucky Charms marshmallows**

I mean; 'I'm Feeling Lucky' costs Google \$110 million a year

And syllables dissolve sticky sweet on my tongue- instantly
